

Lung Cancer Screening Criteria

- 55-77 years old
- Currently smoking or quit in the last 15 years
- Have at least a 30-pack-year history of smoking

Lung Cancer Screening Program

- Annual low-dose computed tomography (LDCT) scans
- Health care consultation
- Tobacco cessation program

Lung screening LDCT scan results range from showing no disease to being specific for cancer. However most suspicious nodules turn out not to be cancer. A positive screen LDCT may require further tests to determine whether the suspicious finding is a cancer which often is confirmed by a biopsy.
